

# MANGO POWER M

## Easy Guidelines for Attaching Ground Cables to the Cabinet

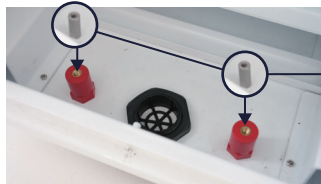

**Step 1:** Remove the cover plate of the Mango Power M Cabinet.

**Step 2:** Locate the grounding section at the bottom.

**Step 3:** Remove the bolts on both ends, then remove the plate.

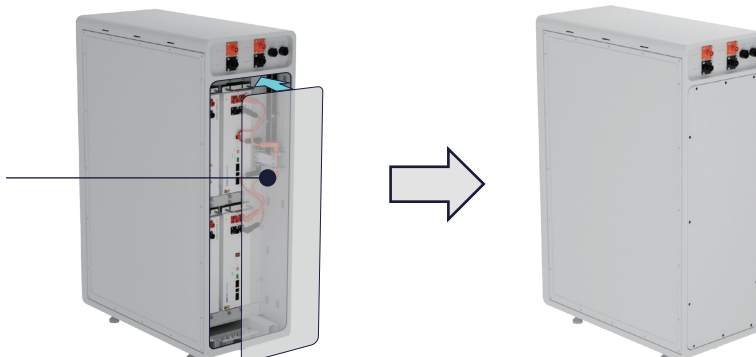

**Step 4:** Replace the two insulated posts with the metal equivalents, provided separately, attaching the ground cables to the bar.

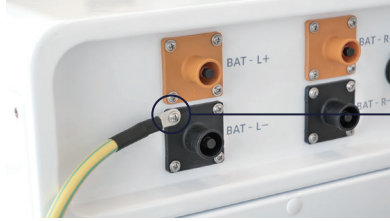

**Step 5:** Place the plate back and tighten the bolts on both ends.

**Step 6:** Restore the cover plate of the Mango Power M Cabinet.

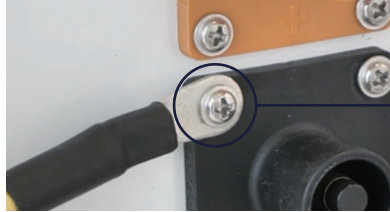

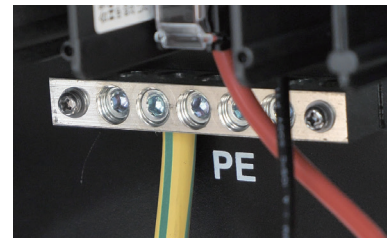

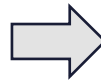

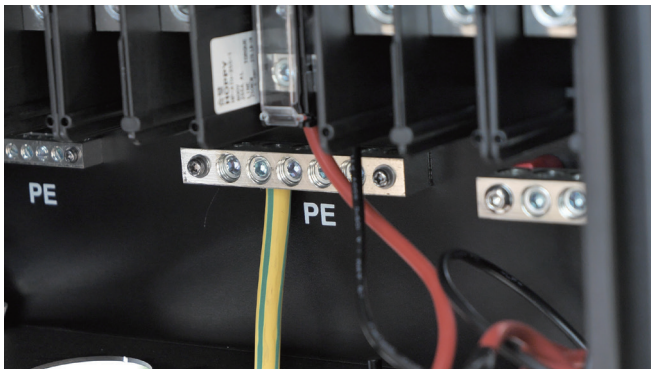

**Step 7:** Locate the connectors at the top.

**Step 8:** Loosen this specific screw.

**Step 9:** Fix one end of the grounding cable, then reattach the screw over the top, securing the cable.

**Step 10:** Connect the grounding cable to the inverter's PE.
